PROBLEM / CURIOUSITY

Portfolio site that hosted four different identities
    Yoga

    Make Up

    Work – Ecommerce / Tech

    Photography/Creative

Interested in bettering my HTML/CSS & learning about Javascript/ JQuery
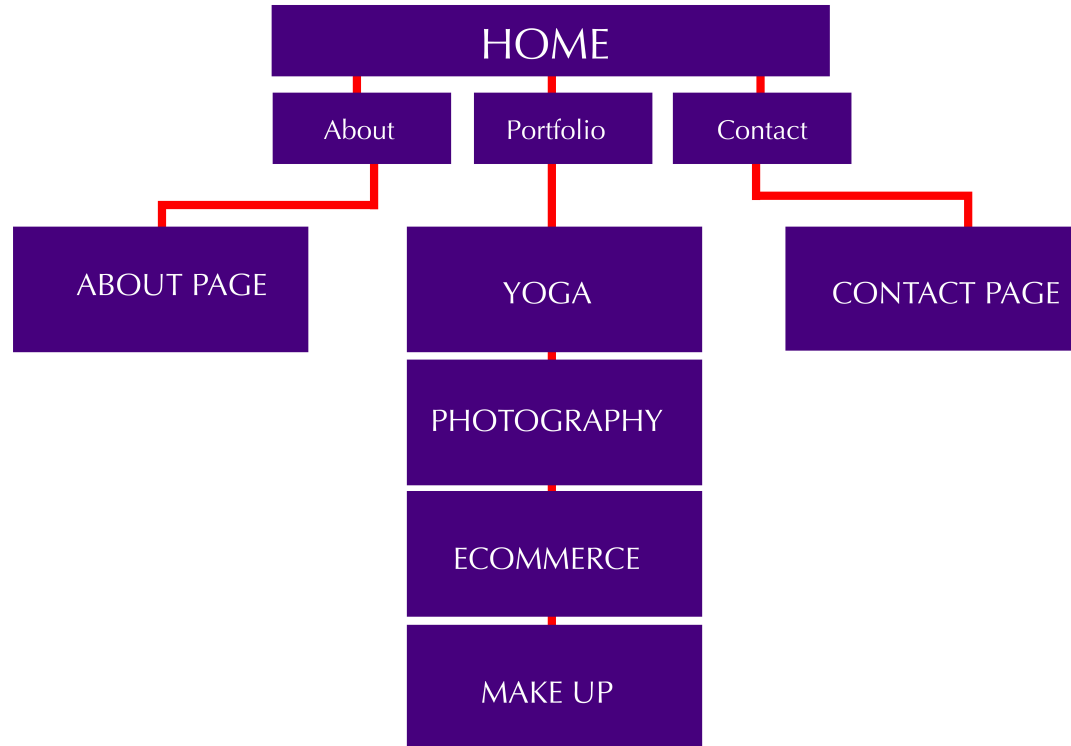

SOLUTION

Bose

SOLUTION

Having four distinct sections that are separated by shades color and left with no label so that it allows some exploration to occur.

Shades of color are used because they're not separate personalities…but variations of the same.

Using CSS and JQuery to allow the content within to unfold once that particular section becomes activated
